DETAILED ACTION

Election/Restrictions

Applicant's election of Species 1, figures 2-6 is acknowledged.

Response to Arguments

Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5, 7-9, 11, 14-19, 22, 24-26, and 29-30 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Ferree (US 7,048,764 B2). Ferree discloses an implant (see figs.1a-1c) comprising first member (102), second member (108) and center member (106). Ferree discloses the radius of curvature of the first member (102) to be larger than the radius of curvature of the second member (108; col.2, lines 8-20, 60-67; col.3, lines 1-11). Ferree discloses the center member (106, 114) to have curvatures that are similar to the curvatures of the first and second members (congruent; col.2, lines 64-66). Ferree's implant inherently translates, due to the structure is the same as the applicant's and therefore will function the same. Ferree discloses the curvatures to be constant (spherical; col.2, lines 66-67). Ferree discloses the first curvature to be concave and the second curvature to be convex (see figs.1a-1c).

Claims 1-5, 7-9, 14-18, 22, 24-26, and 29-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Krueger et al. (US 2006/0116768 A1). Krueger discloses an implant (see figs.1-4) comprising first member (106), second member (102) and center member (104). Krueger discloses the radius of curvature of the first member (106) to be larger than the radius of curvature of the second member (102; shown clearly in fig.4). Krueger discloses the center member (104) to have curvatures that are similar to the curvatures of the first and second members (see fig.4). Krueger's implant inherently translates, due to the structure is the same as the applicant's and therefore will function the same, also is disclosed to translate (P0070, P0075). Krueger discloses the curvatures to be constant (spherical and congruent; P0073).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 3738

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cheryl Miller whose telephone number is (571) 272-4755. The examiner can normally be reached on Monday-Friday 7:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on (571) 272-4755. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
